PROFILE

Motivated Software Engineering undergraduate at the Sri Lanka Institute of Information Technology (SLIIT) with a strong passion for building scalable and efficient software solutions. Experienced in full-stack and backend development using Java, C#, .NET, JavaScript, and MS SQL. Adept at applying Object-Oriented Programming (OOP), MVC architecture, and RESTful API design to solve real-world problems. Eager to contribute to a dynamic development team as a Trainee Software Engineer while continuously learning and delivering high-quality software.

EDUCATION

- **BSc (Hons) Information Technology (Software Engineering)**
Sri Lanka Institute of Information Technology (SLIIT)
- **Certificate in English and IT**
The Open University of Sri Lanka (OUSL)

PROJECTS

01. Online Tuition Class Management System

Technologies: React, Java Spring Boot, MS SQL Server

- Developed a full-stack web application to manage online tuition classes, including student registration, class scheduling, and payment tracking
- Built a responsive frontend using React for an intuitive user experience
- Designed and implemented RESTful APIs using Spring Boot for efficient data handling
- Developed and optimized a relational database using MS SQL Server
- Implemented secure CRUD operations with input validation and error handling

02. Online Examination Management System

Technologies: Java, HTML, CSS, JavaScript, MS SQL

- Developed backend logic for exam management and result processing
- Created responsive interfaces for students and administrators
- Designed database for users, questions, and results
- Performed testing to ensure system accuracy and performance

03. Student Management System

Technologies: C#, ASP.NET MVC, MS SQL

- Developed a CRUD-based system using ASP.NET MVC
- Implemented role-based access (Admin & Staff)
- Designed normalized database schemas
- Applied MVC architecture and OOP principles for maintainability

04. QueuePro - Online Appointment Management System (Mobile Application)

Technologies: React Native, Node.js, Express.js, MongoDB

- Developed a mobile application for managing appointments and reducing queue wait times
- Designed and implemented backend APIs using Node.js and Express.js
- Used MongoDB for flexible and scalable data storage
- Implemented features such as appointment booking, scheduling, and user management
- Applied validation and error handling to ensure data consistency and smooth user experience

STRENGTH

- Teamwork & Collaboration
- Problem-Solving
- Attention to Detail
- Responsibility & Time Management
